

DISTILLATION COLUMNS

- Design tailored according to the application
- Highest quality for highest demands
- Worldwide delivery and installation

Manufactured to meet highest demands!

Our experts use the latest calculation software to design and manufacture our columns, with an optimal cost-benefit ratio, and according all international standards.

At our production plant in France we use our expertise to manufacture duplex steel or stainless steel columns that meet your specific requirements. All columns can be delivered shop insulated.

Perfection through know-how

Thanks to the company's many years of experience in different sectors of industry, our production methods meet highest quality standards and deliver columns with exact tolerances and perfect fit, thus providing you with the best operation conditions.

We also design top head condensers, boilers and reboilers.

Assembly and Service

We realize your plans and deliver columns of any size, anywhere in the world, including the installation at your site. Even large columns are assembled directly on site in shop quality.
