

ZIEPACK EXCHANGERS

For his subsidiary Ziepack (common company between **Ziemex** and Alfa Laval **Packinox**), Ziemex realizes the manufacturing of welded plate heat exchangers based on tube-tube design.

These heat exchangers are L.A.S.E.R. welded, then assembled in a bundle to reach up to 8000 sqm surfaces.

Applications

- Top head condensers for under vacuum columns
- Reboilers
- Heat exchangers
- Energy savers

The advantages

- Heat transfer efficiency with low pressure drop
- Compactness
- Lighter weight
- Lower overall installation cost

Example

Top head condenser
